Notes:
1. Conduits to turn up neatly towards center of the vault. Never under the lip.
2. Interior gravel level must cover holes on sides of vault.
3. There must be 6" of gravel below vault.
4. Vault shall protrude 2" to 4" above undisturbed grade.
5. Vault must be installed level in the hole.
6. Conduits shall be marked to indicate phasing with red (AΦ), white (BΦ), or blue (CΦ). Spare is not marked.
7. Refer to CORED Standard 514 for grounding specifications.
8. Refer to CORED Standard 515A for vault manufacturers.
